

**Bio:**

Divya Singhvi is a Postdoctoral Researcher at the IBM Research AI Residency Program. He recently finished his Ph.D. from MIT, Operations Research Center where he was advised by Prof. Georgia Perakis. His research interests lie at the intersection of machine learning and operations management. Particularly, he has worked on problems related to optimal demand learning, pricing, recommendations and logistics in online and offline retail operations. His research has been tested with companies such as J&J, Myntra, Wayfair and IBM, among others. Prior to attending MIT, Divya received a BS (2015) in Operations Research and Engineering from Cornell University.
