Asa Palley is an Assistant Professor of Operations and Decision Technologies at the Kelley School of Business at Indiana University. He received his Ph.D. in Decision Sciences at the Fuqua School of Business at Duke University. His research uses tools from the fields of decision analysis, operations research, and judgment and decision making to provide insight into managerial problems. He aims to develop novel prescriptive methodology and techniques to equip managers with better information and improve decision-making. His work has been published in the journals Management Science, Experimental Economics, and Risk Analysis.
